

#	Feature Name	Role	Description	Dependencies	Time Estimate
1	View Clients	Admin	Allows an administrator to view a complete list of clients that can be filtered by name, email, or tutor. Can also view when the last time the client used the ArBoard system.	1.1 or 2.1	6
1.1	Add Client	Admin	Allows an administrator to add a client to the complete list of clients. The administrator can add the tutor-to-client relationship or keep the relationship blank. The relationship will be updated automatically when a client logs into a session with a tutor.	1	4
1.2	Deactivate Client	Admin	Allows an administrator to deactivate a client from using the ArBoard system. That is to say that the client will remain in the database and the list of clients, but will not be viewable by the tutors and will not be able to access the whiteboard system.	1	3
2	View My Clients	Tutor	Allows a tutor to see a list of his or her clients that includes their name, email, and the last time they were active on the ArBoard system.	1.1 or 2.1	3
2.1	Add My Client	Tutor	Allows a tutor to add a client to their list of clients so they can track all of their client's data such as email and last activity.	2	2
2.2	Remove My Client	Tutor	Allows a tutor to deactivate a client from their list of clients. That is to say that the client will remain in the database and the list of clients, but will not be viewable by the tutor and the client will not be able to access the whiteboard system. Only an administrator can reactive the client.	2 and 2.1	1
2.3	Invite My Client	Tutor	Allows a tutor to send an email invitation to one of their clients with just a click of a button.	2 and (1.1 or 2.1)	1
3	View Tutors	Admin	Allows an administrator to view a complete list of tutors that can be filtered by name, email, or client. Can also view when the last time the tutor used the ArBoard system.		5
3.1	Add Tutor	Admin	Allows an administrator to add a tutor to the complete list of tutors. That tutor will be given access to the ArBoard system. This is very similar to the current registration system in place.	3	2
